## Career Objective:

Computer Science student specializing in AI and ML with hands-on experience in Python, Java, and web technologies. Proven ability to build scalable projects and contribute to team-based software solutions

## Education:

### Bachelor of Technology in Computer Science and Engineering (AIML)

United Institute of Technology, Prayagraj | 2022–Present | CGPA: 8.74

### Girls' High School & College, Prayagraj, Uttar Pradesh

Senior Secondary Education (ISC) | 2022

80.2%

Secondary School Education (ICSE) | 2020

88.0%

## Work Experience:

### 1. Software Development Intern, Bluestock Fintech — Mar 2025 to Apr 2025

- Led the development of **5+ core features** in a team of 5, resulting in a **30% boost** in platform performance and a **20% reduction** in onboarding time.
- Implemented real-time SQL-based data synchronization, **cutting data latency by 40%** and improving transaction throughput
- Resolved **10+ critical bugs** in collaboration with cross-functional teams, improving platform stability and boosting **user satisfaction by 25%**.

## Projects:

### 1. Personal Portfolio:

- Designed and deployed a personal portfolio to showcase projects and skills, boosting recruiter visibility and leading to shortlisting for **5+ interviews**.
- Integrated interactive social media icons (GitHub, LinkedIn, Instagram), resulting in a **40% increase in profile visibility** and a **25% growth in engagement**.
- Tech Stack: HTML, CSS, JavaScript, Netlify.

### 2. Spam Mail Detection:

- Built a Python-based spam detection system using Scikit-learn, **processing 10,000+ emails**.
- Applied **TF-IDF** for feature extraction and **Logistic Regression** for classification, achieving **95% accuracy**.
- Tech Stack: Python, Scikit-learn, TF-IDF, Logistic Regression.

### 3. Study Plan Generator

- Engineered a web-based app to auto-generate personalized study plans, enhancing user **productivity by 50%**.
- Leveraged algorithmic time-blocking logic to optimize study schedules, resulting in **85% of 150+ users** reporting measurable increases in study consistency and task completion rates.
- Tech Stack: HTML, CSS, JavaScript, Python, Flask, SQLite.

## Skills:

- Programming Languages:** Java, Python, Dart.
- Machine Learning:** Scikit-learn, Logistic Regression, Supervised Learning.
- Web Development:** HTML, CSS, JavaScript, Flask.
- Databases:** MySQL, SQLite.
- Tools & Platforms:** Git, Jupyter Notebook, Netlify, VS Code.

## Certifications:

- Data Structures and Algorithms – AlgoPrep.
- Introduction to IoT – Stanford Online Certification.
- Introduction to Generative AI – AWS Training and Certification.
- Python Programming – GeeksforGeeks.
- Introduction to Cybersecurity – Cisco Networking Academy.
- Core Java & Java Object Oriented Programming.
